Energy & Environmental
Management Solutions

Introducing Ecobility Corporation

a new kind of environmental firm dedicated to providing technical management and problem solving expertise to allow you to achieve your environmental and energy management goals. Our team of professionals has spent the past 30 years identifying conditions impacting the environment, assessing human health risk associated with these conditions, and developing corrective action solutions. Now it's time to focus on prevention through sound management and conservation programs designed to enhance the working and living experience, protect the environment, all while improving the bottom line through operational cost reductions. Our team of engineers, environmental scientists, LEED and architectural designers is ready to provide you with solutions to meet your energy and environmental needs.

ENERGY & ENVIRONMENTAL MANAGEMENT SERVICES INCLUDE:

Brownfield Restoration
Energy Audits & Surveys
Alternative Energy Planning
LEED Site Selection Candidacy Assessments
LEED AP Project Certification Facilitation
Indoor Air Quality Assessments
Carbon Footprint Assessments
Water Use Audits
Cistern & Gray Water
Water Supply Development
Conservation Programs
Storm Water Management Programs
Material & Product Source Identification
